Introducing a new line of handcrafted and sustainably produced Nordic Wax Benches & Stands. True North Woodworking of the Twin Cities is proud to bring this line of benches and stands to the market. These economical benches and stands are a great addition to any skiers' inventory; beginner or expert.

Our **North Country Wax Benches** feature an innovative pin-system for solid ski & binding attachment. This revolutionary concept allows for various levels of adjustment for differing ski types, but holds the ski solid while you work hard prepping & waxing. No more clamps crushing the sides of your skis. Not only does it hold your ski solid, but it allows ample clearance for scrapers, wax irons, and your hands. In addition, our benches feature sliding forms to accommodate all different length of skis.

Also, new this year to our line, we also are offering **North Country Folding Wax Stands**. These stands are built to solidly hold our benches for mobile use. Made out of quality red oak, they are built to withstand tremendous pressure and effort for your on-site prepping and waxing needs. Perfect for keeping in the back of your car for those pre-workout and pre-race waxing sessions.

All our products are made out of quality lumber that is sustainability harvested and milled locally. No mass-production from overseas and no cheap components --just made with care by Nordic skiers in a cold Minnesota shop!

SPECIAL OFFER!

NOW THROUGH DECEMBER 4th: [Use this link for \\$10 OFF STANDS AND BENCHES!!](#)
