

Does this work for a scenario to clarify the scoring system.

Scenario:

Section X has 12 teams participating in their section race.

In their pursuit competition, you would have a max total of 60 skiers, so your base points for that event would be 60. 1st place in pursuit would earn 60 pts, 2nd place would earn 59 pts., etc.

In their sprint relay competition, you would have a total of 12 teams. 10 of which would advance to the finals. Each 'team' place after finals would earn that school 3 points. 1st place team would earn 36 points (3 x 12), 2nd place would earn 33 points, etc.

So here is the order of finish from this section's Races. (I just did top 15 pursuit skiers)

Pursuit Finish Order & Points

- 1 Team A Skier = 60
- 2 Team C Skier = 59
- 3 Team D Skier = 58
- 4 Team A Skier = 57
- 5 Team A Skier = 56
- 6 Team C Skier = 55
- 7 Team B Skier = 54
- 8 Team B Skier = 53
- 9 Team D Skier = 52
- 10 Team A Skier = 51
- 11 Team A Skier = 50
- 12 Team F Skier = 49
- 13 Team D Skier = 48
- 14 Team C Skier = 47
- 15 Team B Skier = 46

Team Sprint Relay Finish Order & Points

- 1 Team D = 36
- 2 Team B = 33
- 3 Team A = 30
- 4 Team C = 27
- 5 Team F = 24
- 6 Team E = 21
- 7 Team G = 18
- 8 Team L = 15
- 9 Team I = 12
- 10 Team J = 9
- 11 Team H = 6
- 12 Team K = 3

	<u>Pursuit Team Score</u>	<u>Team Relay Score</u>	<u>Combined</u>
Team A: 60+57+56	173	30	203 Sec. Champ
Team B: 54+53+46	153	33	186
Team C: 59+55+47	161	27	188
Team D: 58+52+48	158	36	194

In this scenario, the bold scores advance to the State Meet. The "Section Champ" does not qualify all 7 skiers to the state meet, but they would still score higher than any of their fellow section representatives if this result was consistent with their State Meet performance.

% Scoring:

Pursuit: 60 / 96 = 62%

Relay: 36 / 96 = 38%
